It Is Progressing Favorably for the Demo crats-A Vacant Consulship-Pendleton King-Smythe

WASHINGTON, October 16 .- (Special.)-A report just made to the Secretary of Treasury on the operations of the various custom-houses is likely to cause a renewal before Congress to abolish certain ones. It will be remembered that during the last session there was a proposition before the House to consolidate a number of the offices, and to abolish others, and the list included a number in Virginia and North Carolina; but the members from the two States whose districts were affected managed to secure an adverse report. The matter, therefore, was put to rest for the time being. fore, was put to rest for the time being.

There is an impression here that Mr. Pendleton King, of Guliford county, N. C. who is chief of one of the divisions in the State Department, will yet get a cansulate, or some good position in the foreign service, as soon as there is a vacancy at a post that would be congenial.

THE EIGHTH DISTRICT.

Visitors to-day from the Eighth Viritia District report that the meetings of yesterday were all decidedly favorable to the Democrats, the party speakers ing done good work in behalf of Congram Meredith and the principles he est sents. They see that Mason is merely running as a side-show to Pat McCaull's circus in the main tent, and a vote for Mason is just so much help for McCaull. The corpse had not been embalmed, neither was ice used. ATLANTA, GA., October 16.—The Bullding Committee of the women's department of the Cotton States and International Exposition has decided unanimously to Exposition has decided unanimously to employ a woman architect, and they have offered premiums for the best designs, with the competition open to women everywhere. Those wishing to compete are invited to correspond with Mrs. E. C. Peters, of Atlanta, who will furnish all necessary information. The site allotted to the building is one of the best, commanding the whole of Piedmont Park from an eminence. As the main buildings have been designed in a simple, broad, Romanesque style, it is proposed to give the women's building a Colonial type, to harmonize and at the same time hold its own with the larger buildings in its immediate vicinity. The structure will be about 150x25, with generous entrance halls, opening into a large exhibit-room. The southwest facade is to have a broad veranda, with irregular porches in the centre. The building is to be provided with an emergency hospital, with an entrance on the ground floor, and there will be a restaurant and a kindergarten or nursery, where mothers may leave their children.

BOSTON, October 16.-Kidder, Peabody & Co. say that their shipment of half a million in gold was purely a business transaction; that they found that extransaction; that they found that exchange was very scarce, and that it was
actually cheaper to ship gold. There was
no speculative feature in the transaction,
and the house repudiates the idea that it
would be in any such business. The gold
was sent from New York because it was
the most convenient port. Expresscharges would have to be paid to send
it to Boston. Nothing, they say, can be
said about future shipments, because they
